2021-22

**Practical Nursing Program
Training Contract Agreement**

(904) 547-3282 • 2980 Collins Avenue St. Augustine, Florida 32084 • FCTC.edu

CHARACTER COUNTS

You have chosen one of the most trusted professions in the world. Studies have shown that both in the United States and other areas of the world, people have a trust and faith in nurses that far surpasses most other professions. With this honor also comes an incredible responsibility to conduct yourself in a manner that is deserving of this trust. This responsibility does not begin at graduation; it begins upon admission into the nursing program.

Trustworthiness:

Be honest.

Be reliable— do what you say you'll do.

Have the courage to do the right thing.

Build a good reputation. Be loyal— stand by your family, friends, school, and country.

Don't deceive, cheat or steal.

Respect:

Treat others with respect; follow the Golden Rule.

Be tolerant of differences. Use good manners.

Be considerate of the feelings of others.

Don't threaten, hit or hurt anyone, or use bad language.

Deal peacefully with anger, insults and disagreements.

Responsibility:

Do what you are supposed to do.

Persevere: keep on trying!

Always do your best.

Use self-control.

Be self-disciplined.

Think before you act— consider the consequences.

Be accountable for your choices.

Fairness:

Play by the rules.

Take turns and share.

Be open-minded; listen to others.

Don't take advantage of others.

Don't blame others.

Caring:

Be kind.

Be compassionate and show you care.

Express gratitude.

Forgive others.

Help people in need.

Citizenship:

Do your share to make your school and community better.

Cooperate.

Stay informed; vote.

Be a good neighbor.

Obey laws and rules.

Respect authority.

Protect the environment.

STUDENT LEARNING OUTCOMES

The student learning outcomes below provide the framework that directs and informs the nursing curriculum at First Coast Technical College. The importance of each outcome is introduced, emphasized, and reinforced in an organized and thoughtful manner.

1. **COMPETENCE**

The student will demonstrate competence through the delivery of safe nursing care that is based on sound judgment, current evidence, and the utilization of up-to-date technology.

2. **COMPASSION**

The student will show compassion through advocacy and respect for the values, needs, and preferences of individual clients and families.

3. **CONFIDENCE**

The student will develop confidence through inquiry, interdisciplinary collaboration, and clinical reasoning in simulated learning environments and varied health care practice settings to ensure the provision of quality nursing care.

4. **CONSCIENCE**

The student will apply legal and ethical principles based on professional nursing standards while recognizing personal limitations, exhibiting integrity, and valuing the contributions of others.

5. **COMMITMENT**

The student will demonstrate commitment to excellence through professionalism, leadership, ownership of one's practice, and dedication to lifelong learning.

6. **COMMUNICATION**

The student will utilize effective forms of communication including networking strategies and informatics to continuously improve the quality and safety of nursing care for clients, families, and communities.

7. **CULTURE**

The student will integrate culturally sensitive and competent nursing care through a holistic approach that is client-centered and practiced within the context of family and community.

Students will be able to:

- Demonstrate the ability to communicate effectively (read, write, speak, and listen effectively) as well as basic typing and technology knowledge.
- Demonstrate the ability to reflect, analyze, synthesize, and apply knowledge.
- Demonstrate knowledge and application of mathematical and scientific principles and methods.
- Demonstrate the ability to find, evaluate, organize, and use information.
- Demonstrate preparedness to participate actively as informed and responsible citizens in social, cultural, global, and environmental matters.

STUDENT CODE OF CONDUCT

I understand that as a nursing student, I am expected to conduct myself in a professional adult manner while in the class and clinical areas. All staff is responsible for the conduct of any student on campus.

When a student’s conduct seriously affects the College’s operation or property in a negative way, the student will be disciplined according to FCTC regulations up to and including dismissal from the College and/or payment for damaged property.

Core Performance Standards for Admission and Progression*		
Nursing involves the provision of direct care for individuals and is characterized by the application of knowledge in the skillful performance of nursing functions. Therefore, in order to be considered for admissions or be retained in the program after admission, all students must be able to demonstrate the following abilities: emotional, perceptual, functional and physical competency.		
Issue	Standard	Examples of Necessary Activities (not all inclusive)
Interpersonal	Interpersonal abilities sufficient to interact with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds.	Establish rapport with patients/clients, colleagues.
Emotional Stability	The student will be subject to oral and written performance evaluation by instructors on a continuing basis	Evaluate his or her performance dispassionately, avoiding defensive and self-justifying behavior.
		Identify areas for improvement of his or her performance.
		Changes his or her behavior and smoothly adapt to changing conditions.
Mental Requirements	Students should possess the emotional stability and health needed for full utilization of his or her intellectual abilities.	
Memory Requirement	Remember names, facts, concepts, and theories.	Remember task and assignment given at the beginning of a period and extending several days.
		Remember multiple tasks and assignments given to self and others during laboratory, class or shift.
		Remember multiple tasks/ assignments given to self and others over long periods of time.

Issue	Standard	Examples of Necessary Activities (not all inclusive)
Communication	Interact with others in verbal and written form.	Explain treatment procedures, initiate health teaching, document and interpret nursing actions and patient/client responses.
		Communicate verbally with individual patients, staff members, visitors, and telephone callers in order to explain detailed information.
		Communicate verbally with small groups in an informal setting. Initiate honest agreement or dissent regarding interpretation of data
		Perform detailed written documentation daily.
Travel Requirement	Required use of a personal vehicle to attend classes and hospital clinical preceptor sites.	Use of a motor vehicle and a valid driver license.
Critical Thinking/ Coping	Critical thinking ability enough for clinical judgment. Ability to make fast decisions in stressful situations in a professional manner.	Identify cause-effect relationships in clinical situations, develop nursing care plans, display good coping mechanisms.
		Must be free of mind-altering drugs, including alcohol.
		Must be able to recognize emergency situations and take appropriate action.
Concentration	Concentration on minimal detail with little interruption.	Concentration on moderate detail with little, some, or constant interruption.
		Concentrate on fine detail with little, some, or constant interruption.
Attention	Attend to a task/function for 45-60 minutes at a time.	

Issue	Standard	Examples of Necessary Activities (not all inclusive)
Conceptualization	Understand and relate to specific ideas, generally, one at a time.	Understand and relate to specific ideas, generally, several at a time.
		Understand and relate to the concepts behind specific ideas.
		Understand and relate to the theories behind several related concepts.
Environmental Conditions	Student may be exposed at different times to various conditions and substances.	Properly handle human blood, urine, body tissues, or fluids; hazardous biomedical wastes other than blood, body tissues, or fluids.
		Properly protect self and patients from grease or oil, toxins, cytotoxins, or poisonous substances; dust, mold, respiratory and contact allergens; other hazardous materials such as chemicals; sharply pointed and sharp-edged objects.
OSHA Category for Blood borne Pathogens Exposure	Routine exposure to bloodborne pathogens and Master of Safety procedures and knowledge about safety policies, materials, and procedures.	Follow Standard Precautions Procedures
Responsibility for Non- Discrimination	Affiliated clinical facilities are committed to compliance with Title VI of the Civil Rights Act of 1964 and Section 504 of the Rehabilitation Act of 1973.	Perform nursing care without regard to race sex, religion, age, sexual orientation, handicap, or national origin of patient, physician, nurse, visitor, another student, etc.
Responsibility for Professional Confidentiality	Respect the privacy of individuals receiving medical care. (HIPAA Law)	Refrain from discussing any patient information with individuals not directly involved with medical treatment of that patient.

Issue	Standard	Examples of Necessary Activities (not all inclusive)
Ethics	Ethics involve moral values and principles that affect personal and professional conduct.	Accept the moral and legal responsibilities for individual actions. Will provide care to patients in a reasonable, compassionate, considerate, knowledgeable and professional manner. As a member of the health care team, will communicate academic and clinical information in a truthful and accurate and timely manner.
Mobility	Physical abilities sufficient to move from room to room and maneuver in small spaces.	Move around in-patient rooms, workspaces, and treatment areas; administer cardio-pulmonary procedures.
Coordination	The Student will need moderate coordination throughout the program	<p>Performing body coordination such as walking, stooping, etc.</p> <p>Performing tasks that require hand-eye coordination such as keyboard skills, injections, etc.</p> <p>Performing tasks that require arm hand steadiness such as invasive procedures, etc.</p> <p>Walking and standing. Sitting and/or Standing for prolonged periods.</p> <p>Assuming uncomfortable positions such as bending over tables, etc.</p>

Issue	Standard	Examples of Necessary Activities (not all inclusive)
Motor Skills	Gross and fine motor abilities enough to provide safe and effective nursing care.	Calibrate and use equipment; position patients/clients.
		Performing simple motor skills such as standing, walking, etc.
		Performing simple manipulative skills such as washing, writing, collating, etc.
		Performing moderately, difficult manipulative skills such as positioning patient, using a computer keyboard, etc.
		Performing difficult manipulative skills such as invasive procedures, calibration of equipment, etc.
Stamina	Enough stamina to provide patient care and related responsibilities for extended periods of time (8-12 hours).	Adapt to shift work. Lift without restrictions from standing position.
Strength	Moderate muscular strength maybe needed throughout the program.	Pushing, pulling, and lifting objects of at least 50lbs.
Speech and Hearing	Auditory ability enough to monitor and assess patient health needs	Hear blood pressure accurately, hear alarms, emergency signals, auscultatory sounds, cries for help.
		Ability to communicate effectively and sensitively in order to assess both verbal and non-verbal communication and to adequately receive and transmit information to the patient and to members of the health care team.
		Hear normal sound with some background noise.
		Hear normal sounds as in conversation, answering the telephone, intercom, etc.
		Distinguish such sounds as voice patterns, instrument function, etc.

Issue	Standard	Examples of Necessary Activities (not all inclusive)
Visual	Visual ability enough for observation and reviews necessary in nursing care.	Observe patient/client responses.
		Prepare and administer medication accurately.
		See objects closely as in reading patient sample information and test instrument data.
		Differentiating colors and visual structures as in reading microscope slides, labels, color comparison charts, warning symbols, etc.
Tactile	Tactile ability enough for basic physical assessment.	Perform palpation, functions of physical examination and/or those related to therapeutic intervention, e.g. sense temperature change, assess peripheral pulses, insert a catheter.

INSURANCE

FCTC does not carry personal health insurance on students. Students are personally responsible for their own accident/health insurance. All students enrolled in the practical nursing program purchase medical liability (malpractice) insurance, this cost is included in the program fees.

DISCIPLINE

Student conduct and discipline is based on School Board rules, which adhere to Florida Law, Chapter 1006.07(2) F.S., Code of Student Conduct. Students are required to read and understand responsibilities as stated in the FCTC Student Handbook.

DECLARATION OF INTENT

First Coast Technical College’s mission is to provide career, technical, & adult education to meet the changing needs of students, businesses, & the workforce. We expect that our students will attain certification and/or licensure appropriate for their field. However, there are times when students enroll in our career courses for reasons other than certification and/or employment. In that case, students must declare his or her intent to enroll for personal reasons, waiving their commitment to attain certification and/or licensure.

DRUG SCREENING and BACKGROUND CHECKS

I understand before I can participate in clinical training, I must have a Level II background check by Student Check. I understand that information received regarding any offense will be handled on an individual basis. I understand an offense of a serious nature could result in the following:

- unable to attend the required clinical training for the program.
- not be permitted to take the Florida State Board Examination, which is mandatory to obtain a practical nursing license.
- not be employed after completion of the program.

I understand that prior to clinical training; a urine drug screen will be required. I understand that I will be contacted by the Medical Review Officer should the test results indicate a positive reading for illegal substances or prescription drugs. If the substance is illegal or a drug for which I do not have a valid prescription, I will be immediately dismissed from the Practical Nursing program.

SUBSTANCE ABUSE POLICY

For the purposes of this program, substance abuse is defined as the abuse or illegal use of alcohol and/or drugs, and being under the influence of such, while participating in any school sanctioned activity.

The Nursing Department faculty actively opposes the ingestion of any substance that interferes with healthy development and function in the physical, psychological, social, occupational and spiritual areas.

First Coast Technical College Policies and Florida State laws governing Practical Nurses both consider substance abuse to be a health and safety problem. Substance abuse has significant negative effects on safety and performance. Patients/clients are at risk for serious injury if a student is under the influence of a substance, which inhibits performance. **THE SAFETY OF THE PATIENTS/CLIENTS IS OUR FIRST PRIORITY.**

Expectations

All student nurses shall abstain from alcohol and/or drug use within eight hours prior to their practicum and class periods. This includes the use of illegal drugs, the illegal use of prescription drugs, and the abuse or illegal use of alcohol. Attending classes and/or practicum while under the influence of alcohol and/or drugs will be cause for dismissal from the program.

If a student takes a prescribed medication, he/she must inform his/her instructor. If the medication causes the student to be sleepy or slow in response, he/she may be sent home. ***A student under the influence of any substance may not drive themselves.*** An individual on medications that dull the senses is not considered a safe practitioner.

ALL/ANY REPORTS OF SUBSTANCE ABUSE IN ANY SCHOOL-SANCTIONED ACTIVITY WILL BE ACTED UPON IMMEDIATELY. (See "Procedure" below).

SUBSTANCE ABUSE POLICY (continued)

If a student nurse should be convicted of a drug-related felony, he/she will be dismissed from the Nursing Program. Health care facilities will not allow students who have been convicted of a drug related felony to practice in the clinical area. The Nursing Department will assist and support any student who wishes to obtain help for drug related problems.

Reporting Suspected Substance Abuse

A staff member of the agency who suspects a student of being under the influence of alcohol and/or any other drug should immediately report this observation to the agency supervisor and the FCTC instructor.

A student who suspects a peer of being under the influence of alcohol and/or any other drug should immediately report this observation to the FCTC instructor.

Procedure

An instructor who has received a report of suspected abuse or who suspects a student of being under the influence of alcohol and/or any other drug will immediately remove the student from direct patient care. The instructor will then confer with another instructor or agency staff member to assess, and if possible, confirm, the evidence of suspected alcohol or drug use. ***A student under the influence of any substance may not drive themselves.***

Should **two agree** that there is observable evidence of substance abuse, the following will occur:

- The student will submit to urine and blood drug testing immediately. *Failure to submit to the testing will result in immediate dismissal from the program.*
- It will be the student's responsibility to arrange for transportation to the testing facility. Students suspected of substance abuse may not transport themselves.
- If the test results are positive or not immediately available, the student will not be allowed to drive and/or leave the testing facility alone. It is the student's responsibility to arrange for safe transportation home.
- The student will be suspended from all Nursing Program activities until the Health Careers Specialist and/or Practical Nursing Instructor receives a copy of the test results.
- If the results for alcohol and/or drugs are positive the student will be immediately dismissed from the program.
- All expenses incurred due to mandatory testing and/or required transportation shall be the responsibility of the student.

Readmission

Students dismissed for alcohol/drug problems must provide documentation of substance abuse treatment prior to readmission to the Nursing Program. In addition, the student will be required to adhere to a plan, developed in conjunction with a counselor, for ongoing evaluation of compliance to the substance abuse policy.

CELL PHONES

Cell phones are not permitted on your person or in your possession in the clinical/lab or during testing. Cell Phones may be used in the classroom during assignments with instructor approval.

Cell Phones out when not approved the progressive discipline plan will be implemented.

All call outs/emergency calls should be directed to the instructor. ***When in clinical, emergency calls should be directed to the clinical instructor.*** Students must submit a follow up email to the instructor regarding absence or missed time.

STUDENT TRANSPORTATION

I agree to provide my own transportation to and from classroom, hospital and other activities. When carpooling, if one student leaves, the others in the carpool must make alternate ride arrangements or be docked the time missed. Students are required to maintain a valid driver's license if driving. **Students must disclose to Health Careers Specialist if driver's license is not current.**

PROGRESS IN PROGRAM

I agree to make consistent progress as required toward meeting the objectives necessary to successfully complete the program. I understand this will/may require personal responsibility for study time (***minimum of 30 minutes per each hour of lecture/lab time required to be successful***), reading textbooks and accessing supplemental sources such as ATI and Davis Plus and spending time beyond classroom/lab hours practicing skills.

I understand the clinical setting is not the learning environment but the environment to demonstrate my skill proficiency. I understand I will be given minimal coaching in the clinical area when performing procedures, because I have had the opportunity to master the skills in the lab setting.

Once a competency has been achieved, the student is responsible for continued application and correct procedure throughout the Practical Nursing Program. If an incorrect application and/or procedure are observed by the faculty, the competency must be retested. This may require repeating the appropriate course.

The clinical schedule will include and require longer hours and travel depending on the course in which the clinical rotation occurs.

Lab remediation experience outside of classroom time may be assigned in the nursing lab at any campus. Classes, labs, clinicals will/can be held at any FCTC campus which may require students to travel.

I understand that failure to progress either clinically or didactically will lead to dismissal from the program.

I understand and agree that if, for any reason, a clinical facility refuses to allow me to gain clinical experience at the facility; I will be referred for an Admissions Review and possible dismissal from the program. An Admissions Review consists of a Vice Principal of FCTC, the Program Specialist of Health Programs, and a practical nursing faculty member discussing the situation, interviewing the student, and determining appropriate action.

GROUNDINGS FOR ADMINISTRATIVE REVIEW

Refusal of clinical placement or assignment

Abandonment of assigned station or patient assignment

Patient abuse or neglect (physical, verbal or emotional)

Refusal of the agency, institution and or instructor to provide clinical/classroom experience or placement due to, but not limited to the following:

- a. Poor, unsafe clinical/lab performance
- b. Previous employment performance
- c. Disrespectful attitude /aggressive behavior towards institution, staff, instructors or patients, and other students
- d. Non-compliance with policies, procedures or regulations of institution
- e. Any breach of ethical or legal standards
- f. Behavior or manner deemed unsafe to patient contact caused by the effects of any substance
- g. Results of drug screen or criminal background check

Student must disclose any issue with any clinical facility to their instructor prior to rotation.

STUDENT NURSE COMMITMENT

As an FCTC Practical Nursing student, I recognize that a commitment to the following will improve my chances for success in the program:

- Give each course and the entire program my BEST effort
- Be in class and/or clinical at the designated time for the designated hours
- Always be prepared prior to class or clinical i.e. Reading, Studying, Assignments and/or homework, workbooks, study guides
- **It is recommended you devote a minimum 30 minutes of study time for each hour of lecture, this time is above the time required for preparing for class/clinical and/or homework**
- Keep an open mind and develop problem solving skills, critical and creative thinking skills in the clinical and classroom setting
- Complete all homework/assignments for both clinical and class, on time and in proper format as well as assigned remediation tools in the skills lab or online
- Understand that a certain amount of stress is normal, you must use appropriate coping mechanisms in stressful situations
- Seek assistance from instructors as needed for clarification and issues (personal or academic) that could impact your education
- Review and use ATI information to enhance educational understanding
- Observation of nurses performing work-based activities to bridge the gap of academics and patient care standards

DRESS CODE

Professionalism begins with appearance and attire. This policy is formulated to ensure high standards of dress and appearance in representing FCTC to area hospitals, long-term care facilities and in community settings. The values of asepsis, client safety, and client sensitivity are also incorporated. Faculty reserve the right to ask a student to leave the clinical area or classroom/lab if appearance is not in keeping with this policy. This will be counted as an absence and time will be docked.

I agree to dress in accordance with accepted standards in the nursing profession, including health and safety requirements, as outlined below:

Clinical - ALL CLINICAL POLICIES BELOW APPLY TO CLINICAL, PRECEPTOR ROTATIONS AND SIMULATION LABS.

- Uniforms must be clean, neat and wrinkle free. The pants must be plain royal blue with no split on side. The top must be the approved FCTC top with logo. If a skirt or dress are worn they must be approved by FCTC Practical Nursing Department, white stockings will be worn with skirts.
- **Uniforms are not to be worn out in the public.**
- Uniforms should be ***washed and wrinkle free.***
- Shoes must be all white leather/vinyl/polymer flat; plain athletic or nursing ***shoes (no mesh or fabric, minimal perforations)***. Shoes must have closed toes and backs. No clogs are allowed.
- Shoes must be clean, polished, and in good repair always.
- Hose or socks must be worn. Hose and/or socks worn must be solid white without designs. Full length support hose is strongly recommended.
- All aspects of the uniform must be in good repair with no unapproved alterations.
- Underwear may not protrude from the uniform. **Thong style underwear is not permitted.** Underwear must be of an appropriate color with no logos or prints to not be visible through the uniform fabric.
- An approved lab coat with the FCTC logo may be worn over the student uniform.
- Hair must be worn **off the collar** neatly arranged, off the face, shoulders and out of the eyes. No extreme style may be worn in the clinical area. Color must be natural. Hair clips/ties should be plain and the color of student's hair.
- Men may have facial hair that is well groomed and short.

- Natural fingernails must be clean and not beyond fingertips in length.
- Natural fingernails are the only acceptable nails in the program. No polish of any color or kind is allowed. No acrylic, artificial or SNS nails of any kind are permitted. This policy applies to clinical, simulation labs, and classroom.
- The only jewelry allowed in the clinical/laboratory area is a wristwatch with a second hand. A Medic Alert bracelet or necklace may be worn with FCTC Nursing Education Department approval when appropriate. Clear jewelry retainers may be worn, they must be totally clear with no decorations, or stones. This policy is to be maintained at any time the student is in uniform. No, I-watches will be allowed.
- Make-up is to be worn modestly.
- No perfumes, colognes or scented lotion, or hand sanitizers are permitted.
- Chewing gum is NOT appropriate or professional while in uniform; therefore, gum is NOT to be chewed at any time in the classroom, lab or clinical.
- No false eyelashes of any kind are permitted.
- Tattoos must be covered within the confines of the required uniform or with tattoo make-up.
- Bandage scissors, protective goggles, face mask, red, black, blue pen, pencil, pad of paper, penlight, skill sheet, tape measurer, small notebook to take notes, blood pressure cuff, hand sanitizer, watch with a second hand, and stethoscope must be carried at all times.
- Stethoscope covers are not acceptable.
- Current FCTC picture Identification badge is always required.
- If a student is employed in a health care setting the college uniform must not be worn when on duty.
- Smoking is not permitted at any clinical sites or on school grounds, this includes but is not limited to vaping and E-cigarettes. This policy will be strictly enforced. Students may not have an odor of smoke on their hair, body or uniform.

CLASSROOM

- All students are to wear the designated class uniform with no unapproved alterations. Uniforms must be clean, neat and wrinkle free. All aspects of the uniform must be in good repair with no unapproved alterations
- **ONLY** athletic shoes or loafers with covered toes and backs and quiet soled heels are allowed. Shoes must be clean, polished, and in good repair always.
- NO flip flops, clogs, slippers, etc. Student may be sent home for the day as an absence.
- Hair must be neatly arranged with good grooming evident at all times.
- Current FCTC picture Identification badge is always required.
- The approved lab coat with the FCTC logo may be worn over the student uniform. • Natural fingernails must be clean and not beyond fingertips in length. No polish of any color or kind is allowed. No acrylic or artificial nails of any kind are permitted. This policy applies to clinical, simulation labs, and classroom.
- Make-up is to be worn modestly.
- No scented perfumes, colognes, lotions or hand sanitizers are permitted.
- Chewing gum is NOT appropriate or professional while in uniform; therefore, gum is NOT to be chewed at any time in the classroom, lab or clinical.
- Smoking is not permitted at any clinical sites or on school grounds, this includes but is not limited to vaping and e-cigarettes. This policy will be strictly enforced. Students may not have an odor of smoke on their hair, body or uniform

I understand and agree I will not be permitted to participate in classroom, clinical or laboratory activities unless wearing the designated uniform. If not in designated uniform I will be sent home and docked appropriately. This is an employability skill requirement which is essential to successfully complete the Practical Nursing program.

NURSING CARE I agree ...

1. To fully prepare myself for licensure and employment as a practical nurse.
2. To become knowledgeable in planning and implementing the nursing care of patients who are relatively stable and whose conditions are free from complexity.
3. To directly assist with the care of patients with more complex nursing needs.
4. To become knowledgeable in the areas of nutrition, health, human development, medications, body structure and function, nursing procedures, medical-surgical nursing, and nursing care of mothers, children, the elderly, and the mentally ill.
5. To fully prepare myself that nursing is a hands-on profession. It is necessary to come in physical contact with peers, instructors, and patients/clients during the educational experience.

STUDENT NURSE RESPONSIBILITIES

The student's primary responsibility is to learn to be a safe, effective, and dependable practical nurse. The following guidelines are given to assist the student in achieving this goal:

- a. Carry out nursing duties, directions and procedures as instructed.
 - b. All first-time procedures will be supervised by instructor.
 - c. Check the physician's written order on the client's chart before administering any treatment or medications.
 - d. Inform instructor of any procedures not performed in class or clinical.
 - e. Report all incidents and errors immediately to the instructor and/or nurse in charge.
 - f. Be always alerted to needs and safety of the clients and report unusual conditions to instructor and to the nurse in charge.
 - g. An informal report should be given to the instructor and nurse in charge when leaving the assigned clinical area for any reason.
 - h. Use initiative and self-direction to seek out learning opportunities.
 - i. Students will be responsible for obtaining clinical assignments, researching, and preparing for clinical, and meeting the clinical rotation objectives.
 - Student assignments will be posted in designated areas on each unit.
 - Students will be expected to dress professionally and wear the official school lab coat with school insignia and photo name tag visible.
 - Students will be knowledgeable and prepared for clinical.
 - Plan of Care will be completed on clients as assigned by instructor(s).
 - If a student comes to clinical unprepared, the instructor may send the student home; which will result in an absence for the day and will be reflected in the clinical grade.
2. Demonstrate professional attitude and conduct by:
- Establishing and maintaining therapeutic communication and interpersonal relationships with patients/clients, family members, staff, classmates, and faculty.
 - Discussing patients/clients only in the classroom or clinical area with appropriate staff.
 - Identifying patients/clients known personally to instructor for review and possible reassignment.
 - Avoiding socializing, discussing your personal life and problems with patients/clients or hospital personnel in the clinical setting.
 - Adhering to the Code of Ethics for Practical Nursing Students.
 - Attending and participating in pre-and-post conferences.
 - Following rules and regulations of the participating health facility.
 - Never accepting gratuities from a patient/client or a patient/client's family member.

CONFIDENTIALITY POLICY

In accordance with HIPAA (Health Insurance Portability and Accountability Act) guidelines - the faculty of the FCTC School of Practical Nursing have adopted the following policy:

1. Except within the structured, teaching-learning situation, all aspects of the client's medically related information and/or data shall not be discussed with any other person or persons under any circumstances.
2. Proper identification as stated in the FCTC Student Dress Code is required before reading charts/records.
3. Under no circumstances is the student to photocopy or record in any way any part of the patient/client's charts/records.
4. Under no circumstances is the student to remove from the Affiliate premises any reports or records pertaining to any patient/client.
5. Students may become privileged to Affiliate information which is considered private.
6. Students who divulge Affiliate or patient/client information acquired during courses may be immediately dismissed from the nursing program.
7. Failure to honor this basic ethical right of the patient/client or Affiliate may result in the immediate dismissal of the student from the Practical Nursing Program.

Student recognizes that the disclosure of confidential information may give rise to irreparable injury to the patient/client or owner of such information, and that accordingly, the patient/client or owner of such information may seek such LEGAL remedies against the student.

NOTE: Any violation of the Confidentiality Policy – Student Agreement may result in disciplinary action including, but not limited to, the possibility of dismissal.

PERFORMING NEW PROCEDURES

When you perform any new procedures

- a. Check for a written physician's order on the patients/client's chart
- b. Review the procedure in the facility procedure book
- c. Assemble needed supplies and equipment
- d. Discuss the procedure step-by-step with your instructor prior to entering patients/client's room
- e. Explain the procedure to the patient/client
- f. Be prepared to critique and evaluate your performance with the instructor after performing the procedure

SAFETY

- I agree to follow all safety rules and regulations as outlined by the instructors.
- I agree not to use equipment until I have been instructed in the proper method of operation.
- I agree to demonstrate my ability to operate, use, and maintain all equipment correctly and safely under the supervision of an instructor, laboratory assistant, or designated student.
- I understand and agree that I am not allowed to leave the clinical site until the designated leave time for any reason.

EXAMPLES OF UNSAFE PRACTICES

- Unorganized work.
- Not being familiar with patient history and record prior to care.
- Guessing at answers.
- Refusing to ask for help.
- Discussing patients with outsiders.
- Not clarifying doctor's order on proper medication, route, dose, time, patient, etc.
- Refusing to accept constructive criticism.
- Not following the accepted procedure.
- Concealing errors and/or making excuses for errors.
- Not using proper disposal facilities for contaminated dressings, syringes, etc.
- Using poor judgment in measures concerning patient safety. (siderails, etc.).
- Not notifying proper personnel of changes in patient status.
- Relying on aides and peers for assistance instead of instructors.
- Failure to assist any patients not assigned when they need/call for help.
- Not completing assignments, and not notifying the proper person (e.g. omitting a treatment or medication).
- Leaving a patient who requires student's presence.
- Taking shortcuts to the detriment of patients.
- Attempting a sterile procedure without understanding the what, how and why of the procedure.
- Failure to report off to primary resource nurse.

INVASIVE PROCEDURES PROTOCOL

During the Nursing Program, you will be participating in laboratory activities in which learning by students requires the use of human subjects as part of the training procedures. As part of your learning activities you may be asked to perform specific skills or be asked to be the subject of specific skill practice by other students.

General Information:

Learning activities that use human subjects shall be conducted under the supervision of the instructor who has been assigned to teach the course.

Before involvement as a human subject, a student must give informed consent. If under the age of 18, informed consent must be obtained from the parent or the legal guardian unless the participant is determined to be an emancipated minor.

Learning Activities

1. Finger stick to check glucose
2. Subcutaneous injections and/or Intradermal injections and/or Intramuscular (IM) injections

Specific Benefits

1. Appreciation for what it feels like to give and/or receive a finger stick
2. Appreciation for what it feels like to give and/or receive an injection

Specific Risks/Discomforts

Minimal exposure/discomfort, bruising, infection

Discomfort related to use of a needle, bruising, minimal exposure to blood, infection
Discomfort related to use of a needle, bruising, exposure to blood, infection

NURSING PRACTICES

The following standards regarding nursing practice are to be followed:

- a. No verbal or telephone orders are to be taken by students from physicians or physician designees.
- b. Students will be supervised by instructor in dispensing medications during all courses; independent performance may only occur with preceptor in the final preceptorship.
- c. At all times during clinical experience, Insulin, Digoxin, and Anticoagulants are to be checked by the instructor (or by preceptor with permission of instructor) before administration by a student.
- d. No I.V. medications are to be administered or IV starts are to be performed by the PN student. PN students will be responsible for checking solution order, amount rate of infusion, IV site, hanging hydrating drips, calculating hydrating drip rates, and discontinuing IV's as ordered.
- e. No blood hanging or co-signing for blood may be done by a student.
- f. No student may participate in controlled substance count without the presence of a licensed professional nurse (the instructor or preceptor if designated by facility) who must cosign the audit sheet.

Students who are employed at a clinical facility may not use their employee login or password during their clinical rotations

STUDENT HEALTH REQUIREMENTS

Each student must provide evidence of immunity against the following diseases. FCTC has contracted with Sentry MD, to store and maintain student health forms. **All health requirements must be completed and submitted to Sentry MD BEFORE going to any clinical site. Failure to meet compliance will result in student(s) inability to attend their clinical rotation and dismissal from the course and/or program.**

- Physical exam – physical exam to remain current throughout PN program
- Immunizations – student must have proof of immunity or proof of immunization for
- Measles – documentation of two immunizations
- Mumps – documentation of two immunizations
- Rubella – documentation of two immunizations
- Tdap – within 10 years
- Varicella – documentation of two immunizations, titer or documentation of disease from physician - 28day requirement between doses
- TB/PPD – within 1 year must remain current while in the program or CXR within 3 years

- Hep B – documentation of three immunizations o Influenza – current flu season
 - CPR – Current Healthcare Provider must stay current throughout PN program
 - Background Check – completed with application
 - Drug Screening – See Precheck sheet for instructions
 - Agency orientation – scheduled by instructor mandatory attendance required
 - COVID precautions – see student handbook – according to CDC guidelines and facility request
- For the protection of you and your patients/clients, inform your instructor immediately if you have any injury/illness/procedure while in the program. A letter from your physician documenting any physical limitations and granting permission to continue in the program is required. A decision will be made by the Health Careers Specialist in collaboration with the student, due to any safety issues of the student and health care clients/patients, as to whether the student may continue in the program.
- I understand I must be able to perform the physical tasks expected of a nurse in the clinical area, including lifting up to 50 pounds and taking care of up to five patients. If, for any reason, I am unable to physically perform these tasks, a maximum of three weeks alternative clinical experience is allowed. At that time, if I cannot physically perform the tasks, I will have to withdraw from the program until cleared by a physician.
- For the protection of you and your unborn child, inform your instructor immediately if you learn or suspect that you are pregnant. A letter from your physician documenting any physical limitations and granting permission to continue in the program is required. A decision will be made by the Health Careers Specialist in collaboration with the student, due to safety issues of the pregnant student and health care clients/patients, as to whether the student may continue in the program.

CLINICAL PERFORMANCE AND STANDARDS

Clinical progress is evaluated with two sets of criteria: Employability Skills and Nursing Practical Skills Objectives.

Employability Skills: I understand and agree I must achieve a minimum of a B within the following ratings on all competencies on the final Practical Nursing Transcript to graduate.

Nursing Practical Skills/Objectives: I understand and agree I must make progress throughout the program and achieve a minimum of a B on my final clinical competencies and objectives in order to graduate.

4 = Consistently	A
3 = Adequately	B
2 = Needs Improvement	C
1 = Not Adequate	F - Failing

Students who receive a (C) Needs Improvement or Not Adequate rating in any skill/objective will need to plan with the instructor(s) to improve in the area(s) cited through the remediation process assigned by the instructor. The student will be required to perform the skill/objective at the (B) adequate rating throughout the program. Lack of consistent acceptable performance ratings in skills/objectives will result in an admission hearing and dismissal from the course/program.

Assignments in the clinical area will be reflected in the clinical overall grade and could affect progress in the program.

I understand and agree that if I do not achieve a grade of B or better rating or above in clinical performance, there will be an initial review of my progress by the instructor, and if necessary, an Admissions Review.

Once a competency has been achieved, the student is responsible for continued application and correct procedure throughout the Practical Nursing Program. If incorrect application and/or procedure are observed by the faculty, the competency must be retested. This may require repeating the appropriate course.

Students are not permitted patient contact, except when and as assigned by the clinical instructor.

A verbal report on the student's clinical assignment must be given to the charge nurse or team leader before leaving the unit. All written/computerized documentation related to the assigned patient care must be completed by the student prior to leaving the unit. No documents may leave the facility with patient identifying information on it for any reason.

The instructor may confer with the health care agency staff on the progress of each student as necessary. Written objectives for the clinical courses are shared with agency staff.

Students need to be well rested prior to beginning a clinical shift as fatigue can impair a person's ability to learn or can cause mistakes/compromise patient safety.

Students must notify instructor and resource nurse if leaving the assigned unit; **students are not to leave the facility during the clinical day.**

I understand if I am absent from a scheduled clinical simulation lab day, I will NOT be able to perform the skill in the clinical setting until I have been checked off in lab by an instructor. I may schedule an appointment with instructor and stay after class to be eligible to attend clinical experience.

WORK BASED ACTIVITIES

In order to participate in real world experiences, apply problem-solving skills, develop positive work attitudes, and good customer service skills, students will participate in supervised hands-on learning opportunities.

OBJECTIVES Demonstrate an understanding of the principles, theories and skills of practical nursing and employability.

EXPERIENCES Clinical Rotation and Preceptorship in long term and acute care facilities provide students with real life work experience that helps to prepare them for employment after program completion. Students receive experience in basic and advanced nursing skills.

COMPETENCIES Students apply required competencies in clinicals and preceptorship rotations and are evaluated by the instructor and preceptor as to readiness for the workplace.

After successfully completing this program, the student will be able to perform the following:

- Demonstrate knowledge of the healthcare delivery system and health occupations.
- Recognize and practice safety, security and emergency procedures.
- Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- Perform patient and personal care as it pertains to the practical nurse.
- Provide patient-centered care for the geriatric population.
- Assist with restorative (rehabilitative) activities.
- Demonstrate organizational functions, following the patient plan of care.
- Demonstrate computer literacy as related to nursing functions.
- Use appropriate verbal and written communications in the performance of nursing functions.
- Demonstrate legal and ethical responsibilities specific to the nursing profession.
- Apply the principles of infection control, utilizing nursing principles.
- Perform aseptic and sterile techniques.
- Describe the structure and function of the human body in relation to health and disease.
- Apply principles of nutrition as it relates to Practical Nursing Scope of Practice.
- Describe human growth and development across the lifespan.
- Demonstrate the performance of nursing procedures.
- Demonstrate how to administer medication.
- Demonstrate how to provide bio-psycho-social support.
- Demonstrate healthy lifestyle responsibility specific to personal health maintenance.
- Implement education and resources for family wellness.
- Participate in Community Health Awareness Forums.
- Demonstrate how to care for the surgical patient with a Cardiovascular, Respiratory, Lymphatic, Musculoskeletal, Endocrine or Integumentary disease/disorder.
- Demonstrate how to care for pre-operative and post-operative patients, utilizing nursing principles.
- Demonstrate how to care for the surgical patient with a Gastrointestinal, Neurological, Urinary, Reproductive or Oncologic disease/disorder.
- Demonstrate how to care for maternal/newborn patients, utilizing nursing principles.
- Demonstrate knowledge of SIDS/ SUIDS as it relates to the practical nursing role.
- Demonstrate how to care for pediatric patients, utilizing nursing principles.
- Develop transitional skills.
- Demonstrate employability skills specific to practical nursing.

EVALUATIONS Students are evaluated by Nurse Preceptors during the preceptor rotation for skill mastery and competence and by the PN Nursing instructor for skill mastery and competence, before and during the clinical experience.

EMPLOYABILITY SKILLS

I understand NO food is allowed in the classrooms per FCTC policy. **ONLY** drinks with screw top lids are permissible.

I understand and agree that employability skills will be evaluated during each course for both clinical and classroom.

I understand and agree that any breach in my employability skills will cause a reduction in my overall grade for each course.

Any breach in employability skills will result in a 5-point deduction per breach. Please be aware deductions will affect the Affect/Employability Skills grade percentage which will affect the overall course grade.

(Breach - i.e. Tardy, absent, uniform, shoes, no ID etc.)

I understand and agree that I must achieve an acceptable or outstanding rating on all factors essential to success in the Practical Nursing program, as indicated on the student competency transcript.

I understand and agree that if I fail to demonstrate competence or acceptable improvement in any one or combination of the employability skills, there will be an initial review of my progress by the instructor, and or Program Specialist and if necessary, an Admissions Review.

I understand that I am a member of the nursing team even though I am a student. I must always be ready to help other team members without being prodded to do so.

I understand in the clinical area after a student has been assigned patients, leaving the patient unit for any reason without reporting appropriately to the resource nurse and instructor and receiving permission to leave is considered abandonment of patients. Abandonment of patients is cause for immediate disciplinary action and possible dismissal from the Practical Nursing Program. Dismissal from the program will be decided by an instructor, program coordinator, and FCTC Vice-Principal during an Admissions Review.

I understand and agree an immediate review by the Program Specialist and/or program manager may be scheduled any time I demonstrate an inability to maintain acceptable employability skills, including professional communication and behavior, deemed essential in performance as a Practical Nurse student.

I understand and agree that nursing related skills will be taught in the program and I will participate as a human patient and/or student nurse under the direction of an instructor/staff member. These skills include, but are not limited to:

- ***All activities of daily living, all personal patient care skills.***

I understand and agree that for clinical lab skills and practice, I will participate in instructor evaluation, self-evaluation and/or peer evaluation, any and all may apply.

ATTENDANCE

I understand that being ready for class means having all books, supplies, in designated uniform and in my seat prepared to receive instruction at the designated start time. Being ready for clinical means having all clinical supplies, in designated uniform in the assigned meeting area ready for your clinical assignment at the designated start time. Failure to meet these requirements will result in loss of attendance time.

I understand the following policies:

I understand and agree that any breach in my employability skills will cause a reduction in my overall grade for each course.

I understand and agree that any breach in the student contract (i.e. absence, tardy, leaving early, other incident) the student must email the classroom teacher the following information on the date of the incident. Employability Skills grade will be deducted 5 points per incident:

- Student Name
- What is Incident
- Date of Incident
- Reason for Incident

Any breach in employability skills will result in a 5-point deduction per breach. Please be aware deductions will affect the Affect/Employability Skills grade percentage which will affect the overall course grade. (Breach - i.e. Tardy, absent, uniform, shoes, no ID etc.)

I understand that I must sign in and out for each scheduled class and/or clinical day with my designated instructor and/or on the designated timesheet to receive credit for any hours present.

I understand that absences and tardiness reduce student attendance time and point deduction in Employability scores, per incident.

I understand time will be docked in fifteen-minute increments, i.e. 8:01 – 8:15 = 15 minutes, 8:16 – 8:30 = 30 minutes, 8:31 – 8:45 = 45 minutes, and 8:46 – 9:00 = 60 minutes. NO EXCEPTIONS.

I understand if I am 30 minutes late for the clinical area I will be relieved for the day because patients must be cared for in a timely manner. I will receive no hours of credit for that day. NO EXCEPTIONS.

Student may be required to complete 30 hours community service volunteer hours through approved community sites.

I understand if I am going to be absent in the clinical or classroom area, I must notify the instructor to whom I am responsible before the scheduled time. Failure to notify your instructor before the scheduled time (no call/no show) is cause for disciplinary action, including but not limited to loss of points, conference with Career Specialist, and/or suspension or dismissal from program.

I understand it is my responsibility to obtain and keep documentation for absences to present as extenuating circumstances in the event of a review with the Career Specialist. I understand documentation considered for extenuating circumstances includes ... court summons, jury duty, physician statement, personal illness, serious illness or death of immediate family member, or natural disasters. Student is to keep this documentation until requested.

Students must complete 90% of the program

I understand if I am absent from a scheduled clinical simulation lab day, I will be docked 5 points on my skills grade sheet. And will not be able to perform the skill in the clinical setting until I have been checked off in lab by an instructor.

Upon the first absence, tardy or any other contract infraction in class or clinical, the student will be given a verbal warning regarding infraction.

Upon the second absence, tardy or any other contract infraction in class or clinical, the student will be written up regarding infraction.

Upon the third absence, tardy or any other contract infraction in class or clinical, the student will be referred to the Health Programs Career Specialist for a review to determine if retention or dismissal from the program. At the review the student may present documentation for extenuating circumstances regarding infractions. If student remains in the program the student will sign an alternative contract.

Students will automatically be dropped from the program, after the sixth consecutive absence, in accordance with the FCTC policy.

I understand I may be allowed to make up 10 hours while in the nursing program. I understand this is a ONE-TIME event and the following apply:

- 1. Must have missed 10 hours or more to participate in make-up time, make-up hours cannot be completed prior to absence.***
- 2. The make-up hours will not be reflected in FOCUS in any way, they count for completion for the Florida Board of Nursing only.***

3. ***The Career Specialist and/or Instructor will determine where, when, and how makeup hours will be completed. (upon space availability)***
4. ***This is a ONE-TIME event for any/all current and returning students, once you have made up the 10 hours this opportunity has been used, it is no longer available in the present or future.***

(The consequences of repeating a course can result in a loss of financial aid)

Course Number	Required Course Hours		Course Name
	Class	Clinical	
PRN0098	165	135	Practical Nursing Foundations 1
PRN0099	150	150	Practical Nursing Foundations 2
PRN0290	150	150	Medical Surgical Nursing 1
PRN0291	150	150	Medical Surgical Nursing 2
PRN0690	60	90	Comprehensive Nursing and Transitional Skills

COURSE ATTENDANCE PROGRESSION

FCTC students are expected to attend **all** class and clinical sessions. As is expected in the workplace, when it is necessary to be absent due to illness or emergency situations, all students are to notify the instructor on or before the date of the absence. Progress through the course is contingent upon attendance. Absences will be linked to grade scale.

Students with absences could be subject to penalties such as loss of financial aid, lower grades, withdrawal from the program, and prohibited from re-enrollment in the next grading period.

THEORY TESTING

I understand and agree to meet the following criteria regarding written exams, homework, and all assigned work. Maintain a minimum, overall average score of 75% in the Practical Nursing Program.

Course Grade

1. Exams/Homework/Projects/Final 50%
 - a. All homework will be averaged as 1 exam for the course
2. Clinical/Lab Simulation 30%
3. Quizzes/Employability Skills 20%

Tests and/or quizzes taken late, not taken when scheduled with the cohort, would be a consequence of -5point deduction on that quiz/test.

Student must have an overall passing score of 75% to advance to the next course.

The grading scale that is used in all nursing courses is as follows:

A = 90 - 100%

B = 80 - 89%

C = 70 - 79%

D = 60 - 69%

F = 0 - 60%

Assignment/Testing/Review Policies:

- All required learning activities are subject to examination.
- Quizzes may be administered in clinical pre/post conferences to evaluate specific competencies identified in the Clinical Evaluation Tools.
- Exams and quizzes may be administered via a computer in the computer lab.
- Scheduled and/or unscheduled quizzes may be given in any/all nursing courses.
- Skills competency examinations may be administered in the campus laboratory.
- The student needs to bring two (2) pencils to the examination site.
- Books, papers, and tape recorders, palm pilots, watches and cell or earphones **are not allowed** during examinations or exam review sessions.
- The student will be responsible for keeping their test scores and will receive academic notice when they are not meeting required course progress.
- For any absence the student is responsible for materials covered on the date absent prior to returning to school and/or clinical.
- If absent for a scheduled exam, an alternate form of the exam must be taken on the first day back in class and **5 points deducted**. There will be no exceptions to this requirement. If the test is not taken at the first possible opportunity, **10 points will be deducted**.
- If a scheduled exam is taken late, but on the same day the student will take an alternate form of the exam which must be taken, and **5 points deducted**. The student must schedule the makeup test with the instructor. There will be no exceptions to this requirement. If the test is not taken at the end of class, **10 points will be deducted**.
- Once the instructor has started a scheduled test, student may not enter and will be considered late and will have to make up the test.
- Student maybe required to come in early or stay late (after class) or on Friday's to make up a missed test.
- Students may not opt out for any reason of any exam if present on the date scheduled.
- Classroom or Clinical assignment/homework not turned in on time will be **deducted 5 points per calendar day**.
- Make up exams must be done the next school/class day, **NO EXCEPTIONS**. These tests will be done by appointment with the instructor.
- *****If all tests for a course have not been completed before the end of that course, the student will receive a zero as their grade and could receive an unsatisfactory rating for that course. *****
(Please note this may jeopardize certain funding arrangements.)
- Cheating is unacceptable and will result in an immediate Admissions Review. Penalties will include suspension or immediate dismissal.

Assessment Technologies Institute (ATI) Testing Process

Students may be required to demonstrate mastery of curriculum content by utilizing the Comprehensive Assessment Review Package provided by ATI. Specific courses may require the student to meet minimum expectations by completing assigned proctored/non-proctored exams to successfully complete the course. The student is required to perform at a minimum of an 80%. Those achieving a less than 80% on the proctored exam will be required to remediate and retest.

STUDENT INTER-COHORT TRANSFER

1. Students may request a transfer between cohorts by submitting an email to Career Specialist for transfer.
2. If the request is approved, students will be allowed to transfer into the next available sequential course, on a space-available basis.

READMISSION TO LIMITED ACCESS HEALTH PROGRAM

This procedure applies to students who fail to successfully complete a course in the Practical Nursing Program. The process for readmission to a limited-access health program depends upon the course the student is requesting to repeat.

- Students who do not pass a program course must request to repeat the course by submitting an email to the Career Specialist requesting re-entry.
- If the request is approved, students will be allowed to enroll in the next available course, **on a space available basis**.
- Students must meet all program and graduation requirements in effect at the time of their readmission. In addition, **students approved to repeat a course will be required to demonstrate retention of essential prerequisite knowledge and skills before being allowed to re-enter the didactic and clinical sequence of courses.**
- Students will be notified by the Health Occupations Office of the next available start date.
- Students will have no more than 2 years to re-enter and complete the program requirements. Students, who are unable to re-enter and complete the graduation requirements within the 2-year allowance, must reapply as a new admission to the program.

OCCUPATIONAL EXPOSURE TO POTENTIALLY INFECTIOUS SECRETIONS

Healthcare workers must balance occupational risks with providing quality care to all clients/patients. As front-line providers of care, nurses have an increased risk of exposure to potentially infected blood and body fluids.

The First Coast Technical College Nursing Program accepts the Center for Disease Control recommendations that all health care workers should strictly adhere to Standard Precautions as the most effective means of preventing exposure and transmission of potentially infectious secretions. Standard Precautions are intended to prevent parenteral, mucous membranes and non-intact skin exposures to health care workers to blood-borne pathogens.

Under Standard Precautions, blood and certain body fluids of all clients/patients are considered potentially infectious for human immune deficiency virus (HIV), hepatitis B virus (HBV), hepatitis C virus (HCV), and other blood-borne pathogens.

The risk of nosocomial transmission of HIV, HBV, HCV, and other blood-borne pathogens can be minimized if health care workers use the following general guidelines:

I understand and agree to adhere to the following communicable disease policies established by First Coast Technical College for all Health Occupations students in contact with potentially communicable patients while performing in clinical areas.

To standardize the delivery of health care to all clients and minimize the risk of transmission of communicable disease, all Health Careers students will:

- Follow instructional guidelines for basic skills in isolation techniques, injections, and handling of body fluids in the skills laboratories before actual clinical practice of these skills on a client.
- Follow classroom instruction related to communicable disease treatment, modes of transmission, and prevention.
- Follow hospital and nursing home procedures and specific policies for prevention of blood and body fluid disease transmission.
- Utilize the following blood and body fluid precautions:
 - Gloves are worn when handling blood and body fluids, mucous membranes, or nonintact skin of clients, or when touching items or surfaces soiled with blood or body fluids (including performing venipuncture and other vascular access procedures).
 - Hands are washed immediately before gloving and again after removing gloves.
 - Hands are washed immediately and thoroughly when contaminated with blood or body fluids.
 - Wash hands between clients.
 - Gloves are changed after each client.
- Gowns, masks, and protective eyewear are worn for any procedures likely to result in or prone to splashing of blood or body fluids.
- Used needles are not recapped, bent or broken, removed from disposable syringes, or in any way manipulated by hand. Disposable needles, syringes, scalpel blades, and other sharp items are placed in puncture-resistant containers for disposal.
- Soiled linen is handled as little as possible with minimum agitation. All soiled linen is bagged and tied closed at the location where used or according to facility policy.
- Gloves are worn for post-delivery care until all blood and amniotic fluid have been cleaned from an infant's skin.
- Upon death, state law requires that a tag be affixed to the body of anyone known to have a blood-borne pathogen.
- Specimens of blood and body fluids are placed in a leak-proof container. When collecting the specimen, care is taken to prevent contamination of the outside of the container. All containers are placed in a zip-lock bag.

- Mouthpieces and resuscitation bags are used in place of mouth-to-mouth resuscitation.
- Students with exudative lesions or weeping dermatitis should refrain from all direct client care until condition resolves.

A hospital and school incident report are to be completed if the student is exposed to blood or body fluids through the following means.

- Needle stick or cut
- Mucous membrane (splash to the eyes or mouth)
- Cutaneous (through skin which is chapped, abraded, or has dermatitis)

Follow-up screening will be recommended according to hospital/school guidelines. **The student will pay all cost of follow-up and screening.**

Follow the infection control guidelines of the obstetrical units in the clinical facilities regarding staphylococcal and herpes infections. These policies state that no person may work in the area if they, or a family member living in the same household, has a staphylococcal or herpes infection (the most common diseases include impetigo, chickenpox, shingles, cold sores, and venereal herpes).

Any student, who has any temporary or permanent condition that may put them or their clients/patients at risk, has the responsibility to notify their instructor.

MANAGEMENT OF OCCUPATIONAL EXPOSURE

Provide immediate care to the exposed site:

- Wash wounds and skin with soap and water.
- Flush mucous membranes with water.

Initiate report:

- Immediately report the incident to the FCTC Instructor.
- Complete an agency “incident report”.
- Complete the FCTC accident form. (must be submitted on-line). • Instructor to submit all forms to FCTC Career Specialist for appropriate submission and follow-up.

Follow-up screening:

- Level of risk will be recommended according to agency/school guidelines.
- The student will pay all costs of follow-up and screening.

First Coast Technical College Practical Nursing Program
INFORMED CONSENT AND WAIVER OF LIABILITY

I, _____, understand that as a clinical student, I may be exposed to environmental hazards and infectious diseases including, but not limited to Tuberculosis, Hepatitis B and HIV (AIDS) while in a clinical facility.

Neither First Coast Technical College nor any of the clinical facilities used for clinical practice assumes liability if a student is injured on the campus or in the clinical facility/practicum during training unless the injury is a direct result of negligence by the college or clinical facility.

I understand I am responsible for the cost of health care for any personal injury I may suffer during my education. I understand that I must obtain and maintain private health insurance while enrolled in the Practical Nursing Program.

I willingly consent to participate in all laboratory treatments and practice sessions (including invasive procedures) as a human subject (i.e., patient) for educational purposes at FCTC. These treatments may be rendered by faculty or fellow students. It is my responsibility to disclose any information or medical issues that will limit or bar me from the above participation to the Program Coordinator, Program Manager and/or Instructor in a timely manner.

I willingly consent to participate in simulated patient interviews in both lab and lecture demonstrations.

I willingly consent to give the Program Specialist or FCTC designee permission to give my student ID and other personal information to the FCTC clinical affiliations and licensure/registration authorities for appropriate reasons.

I willingly consent to give the Health Careers Department permission to release drug testing results, or Criminal Background Information to clinic sites that may require such information as terms of their contract with FCTC for clinical affiliations.

DECLARATION OF INTENT**

First Coast Technical College's mission is to provide career, technical, & adult education to meet the changing needs of students, businesses, & the workforce. We expect that our students will attain certification and/or licensure appropriate for their field. However, there are times when students enroll in our career courses for reasons other than certification and/or employment. In that case, students must declare his or her intent to enroll for personal reasons, waiving their commitment to attain certification and/or licensure.

If you ***DO NOT PLAN*** to work in this field:

Please complete the information below, indicating your reason for enrolling in this program:

I enrolled for personal enrichment.

I plan to work as volunteer or as a hobby.

I plan to continue my education at another college or university.
